Survey Results

Le Comité consultatif en environnement ainsi que le Service de l'urbanisme et de l'environnement sont fiers de vous présenter les résultats du sondage sur les priorités d'actions environnementales.

Vous avez été nombreux à faire entendre votre voix et votre implication est importante pour nous et pour notre municipalité.

Voici donc les résultats compilés, par langue et par thème.

The Advisory Committee on the Environment and the Planning and Environment Department are proud to present the results of the survey on environmental priorities.

Many of you have made your voices heard and your involvement is important for us and for our municipality.

Here are the results compiled by language and by theme.

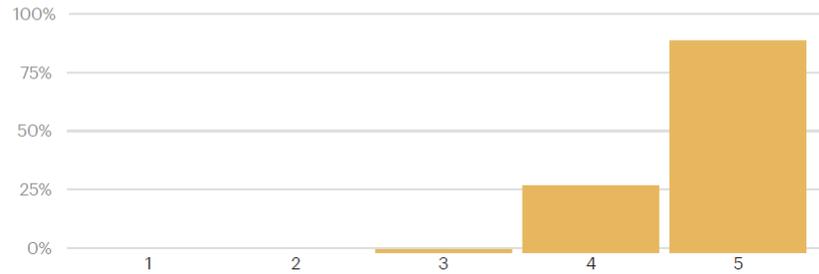

Protection  
du couvert forestier

---

Protection  
of the forest cover

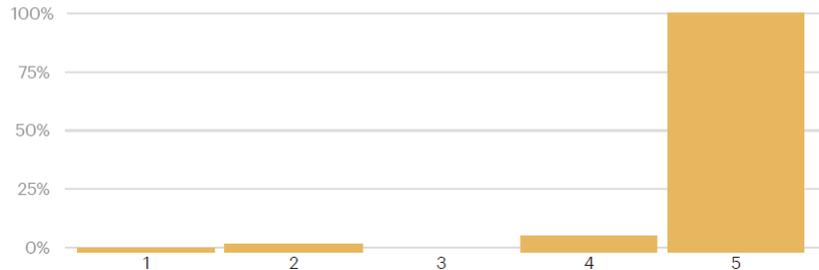

“Préserver les forêts et les boisés. Limiter la déforestation.  
Minimiser les îlots de chaleur.”

Moyenne / Average

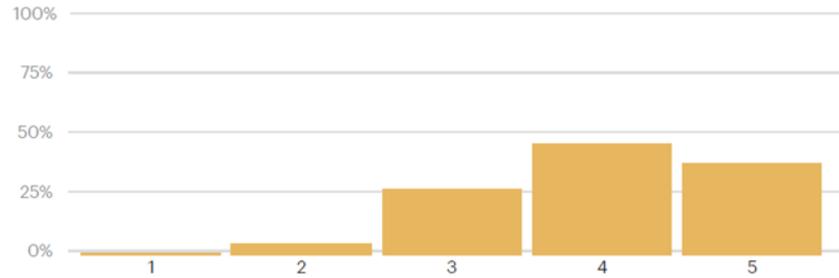

4.75 / 5

“Preserve forests and woodlands – Limit deforestation –  
Minimize heat islands”

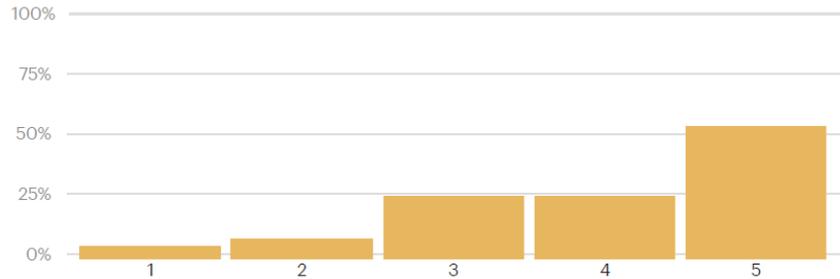

“Encourager l'aménagement durable pour les terrains privés.”

Moyenne / Average

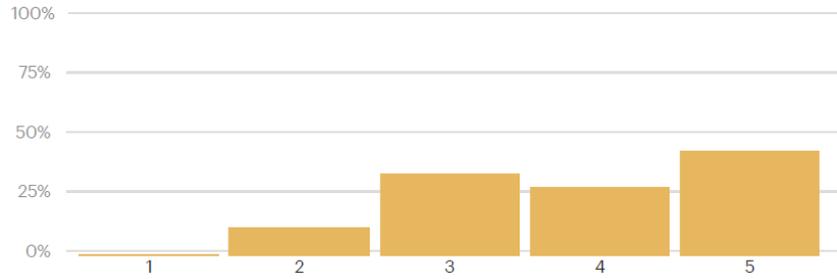

4 / 5

“Encourage sustainable development on private lands”

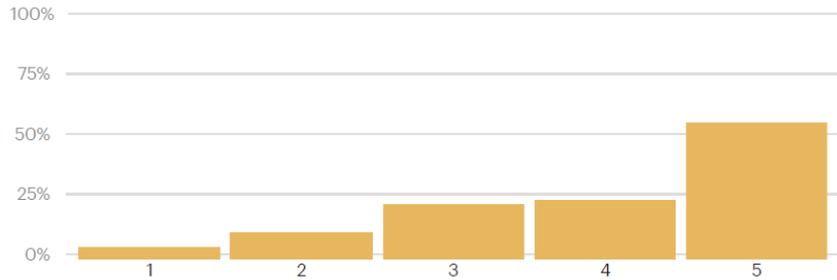

### “Prévenir les incendies.”

Moyenne / Average

3.95 / 5

### “Prevent fires”

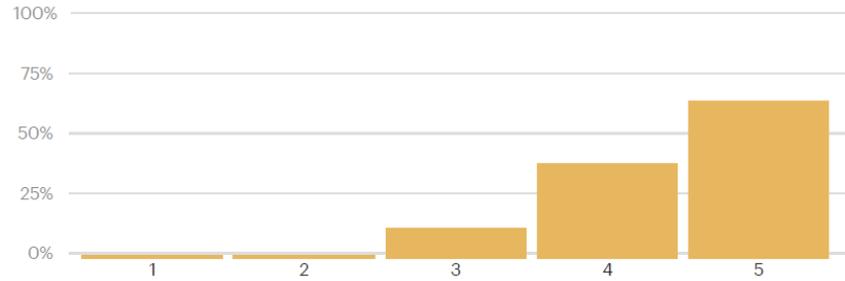

Préservation  
des milieux humides  
et aquatiques

---

Preservation  
of wetlands and  
aquatic environments

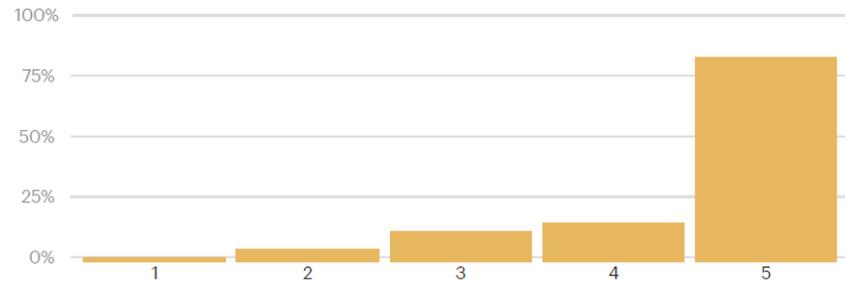

“Favoriser la vie aquatique et la biodiversité.”

Moyenne / Average

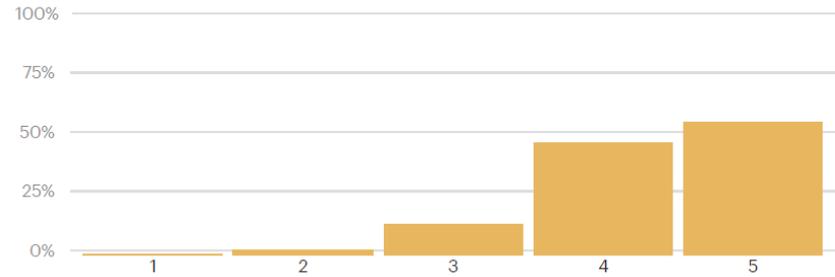

4.45 / 5

“Promote aquatic life and biodiversity”

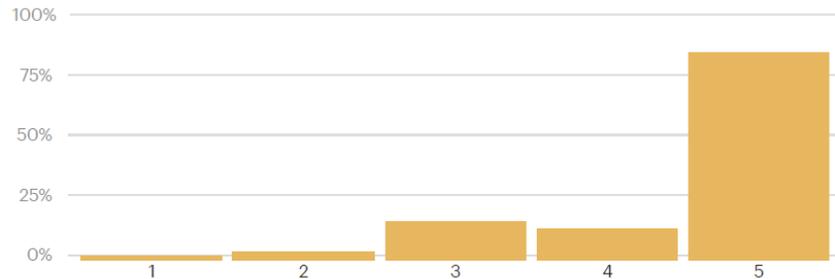

“Contrôler le transport de contaminants vers et par le réseau hydrique.”

Moyenne / Average

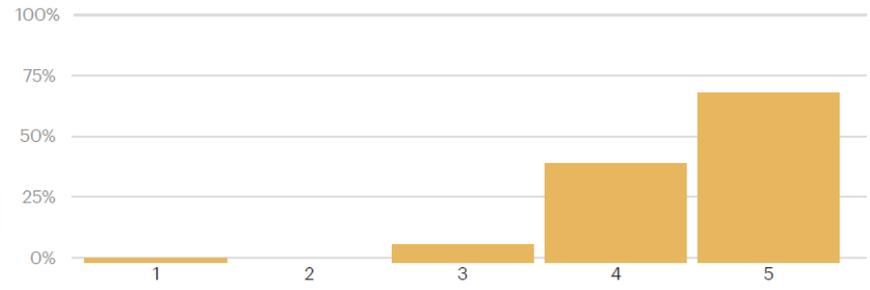

“Control transport of contaminants to and through the water network”

4.4 / 5

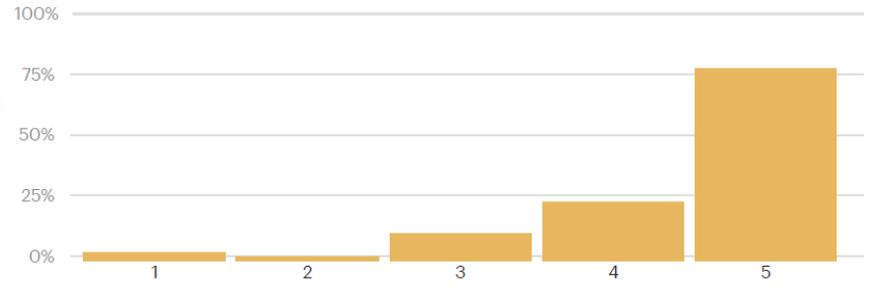

“ limiter les déversements de contaminants et de phosphates.”

Moyenne / Average

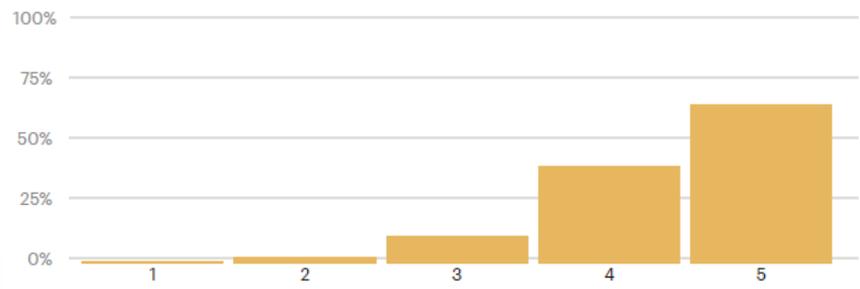

4.5 / 5

“ Limit spills of contaminants and phosphates”

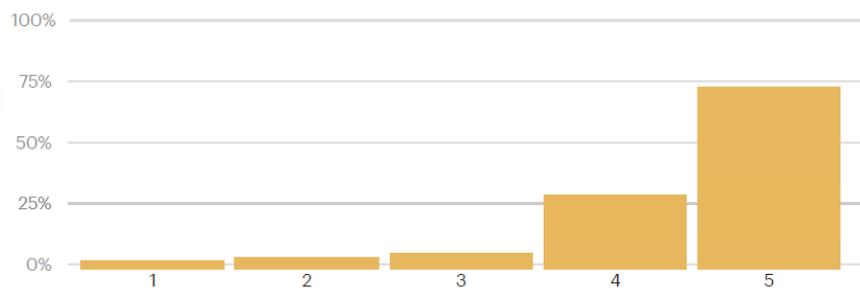

### “Prévenir l'eutrophisation des lacs et des rivières.”

Moyenne / Average

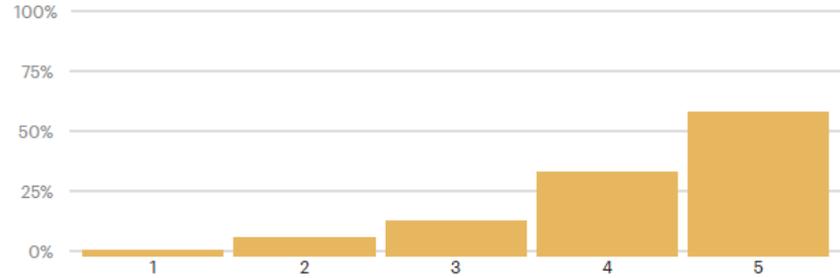

4.4 / 5

### “Prevent eutrophication of lakes and rivers”

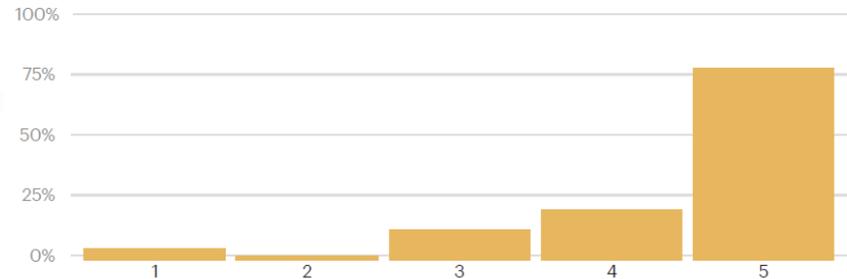

“Maintenir la qualité de baignade des lacs et des rivières.”

Moyenne / Average

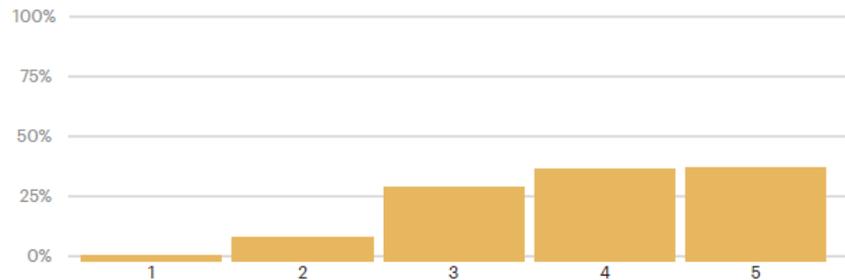

4.3 / 5

“Maintain swimming quality of lakes and rivers”

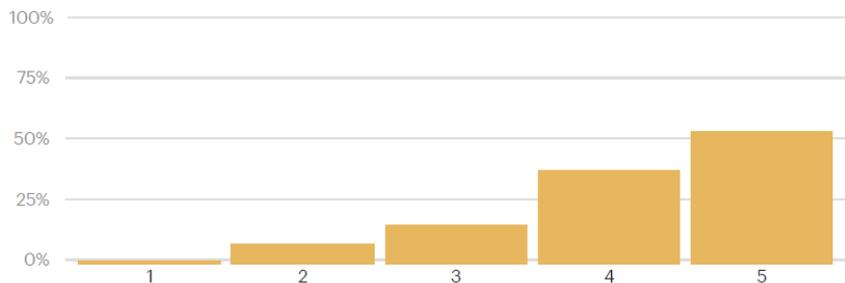

“Limiter les risques d'érosion, de crues et d'inondations.”

Moyenne / Average

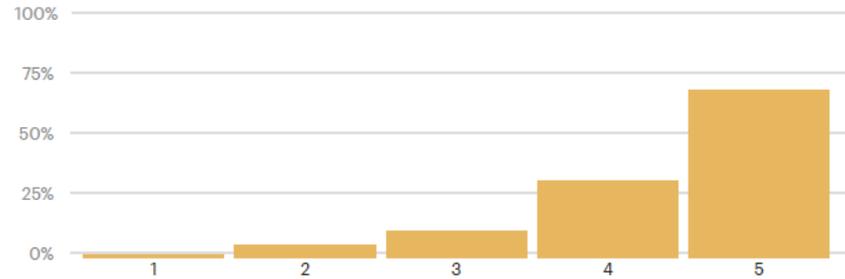

3.95 / 5

“Limit risks of erosion, flooding and inundations”

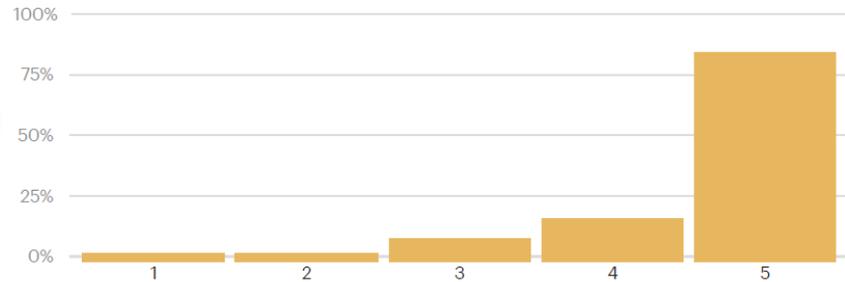

“Assurer la quantité et la qualité de l'eau potable.”

Moyenne / Average

4.45 / 5

“Ensure the quantity and quality of drinking water”

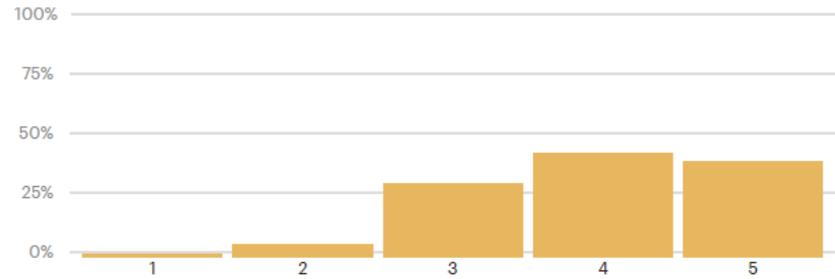

# Célébration de la biodiversité et protection des milieux fragiles

---

Celebration  
of biodiversity and  
protection  
of fragile environments

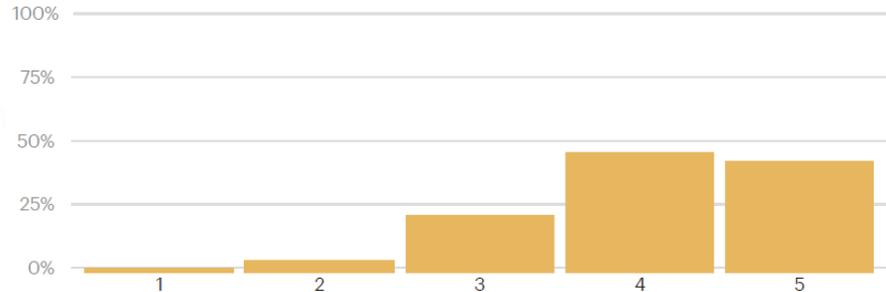

“Identifier les espèces rares ou menacées sur le territoire.”

Moyenne / Average

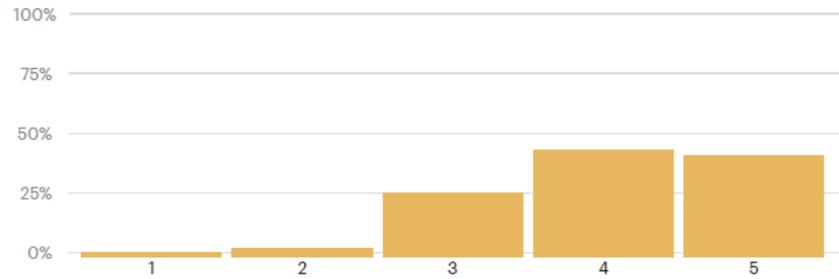

4.05 / 5

“Identify rare or endangered species on the territory”

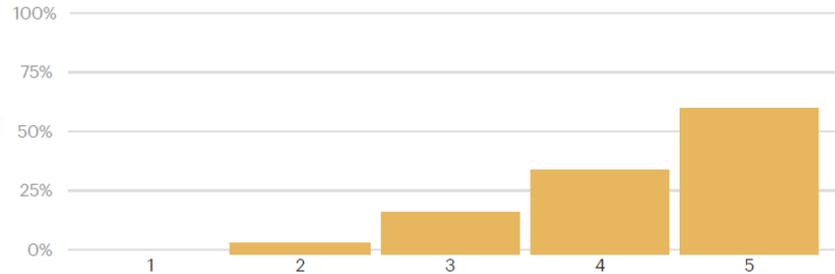

“Utiliser des terrains ou jardins pour en faire des jardins pollinisateurs.”

Moyenne / Average

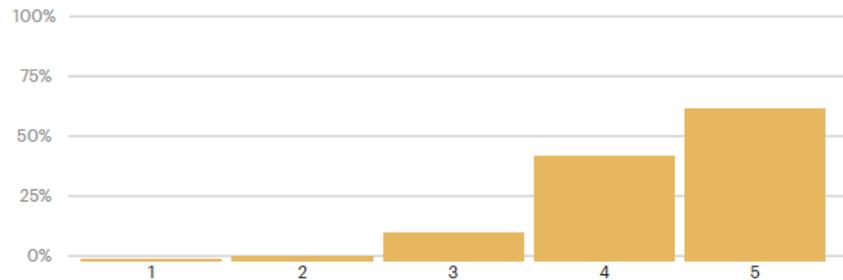

4.15 / 5

“Use land or gardens as pollinator gardens”

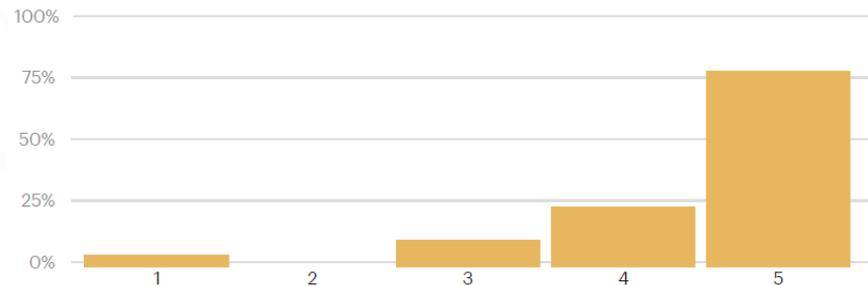

“Contrôler les espèces exotiques envahissantes terrestres et aquatiques.”

Moyenne / Average

4.4 / 5

“Control terrestrial and aquatic invasive exotic species”

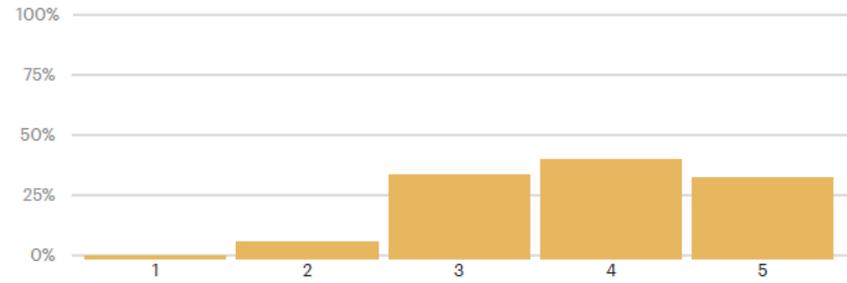

Réduction  
de la pollution

---

Reduction of the  
pollution

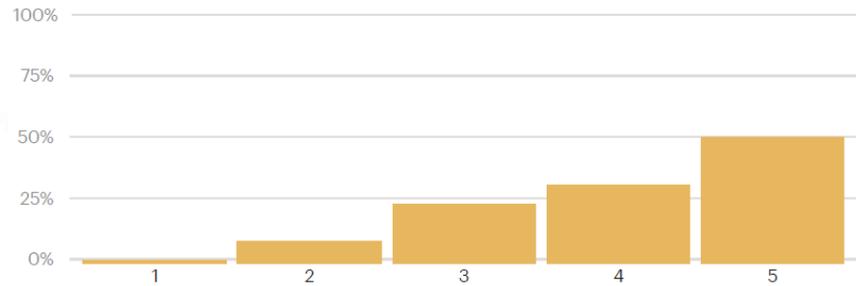

### “ limiter le remblai.”

Moyenne / Average

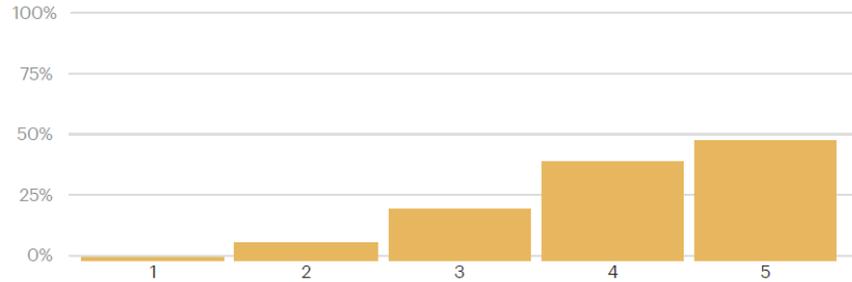

3.9 / 5

### “ Limit backfill”

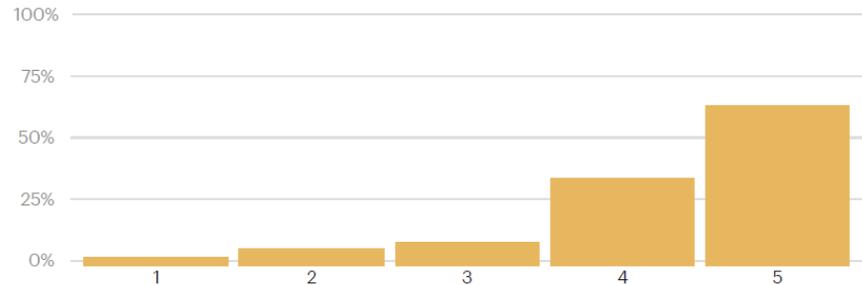

“Rédiger un plan d'action pour lutter contre la pollution.  
(olfactive, poussière, émanations, déchets)”

Moyenne / Average

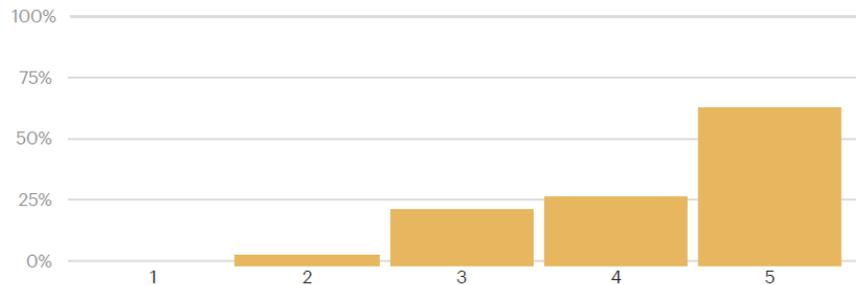

4.2 / 5

“Draft an action plan to fight against pollution (odor, dust,  
fumes, waste)”

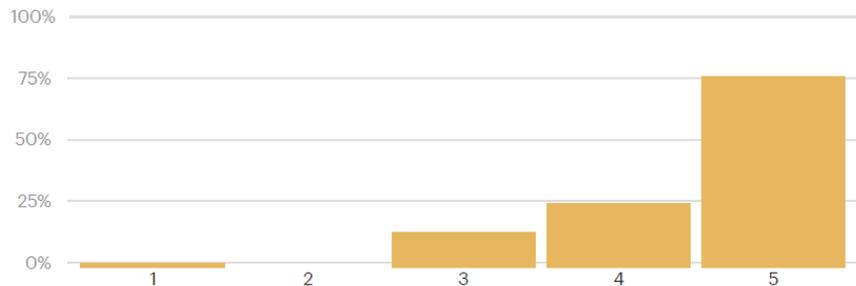

### “Diminuer la pollution sonore.”

Moyenne / Average

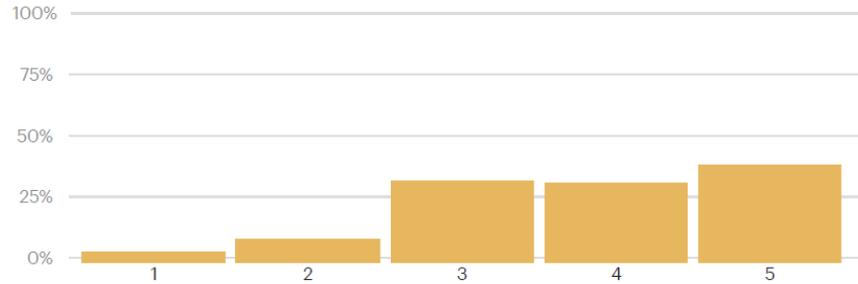

4.4 / 5

### “Reduce noise pollution”

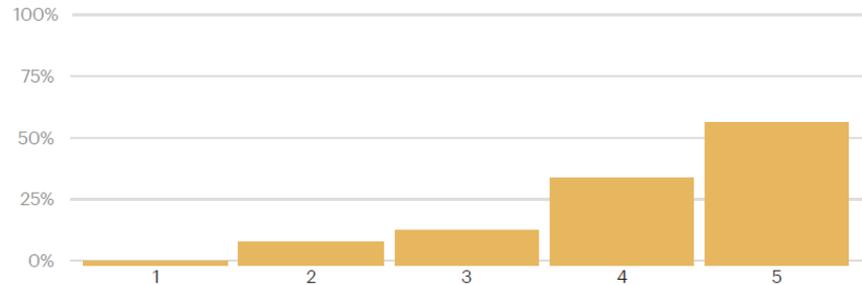

### “Réduire la pollution lumineuse.”

Moyenne / Average

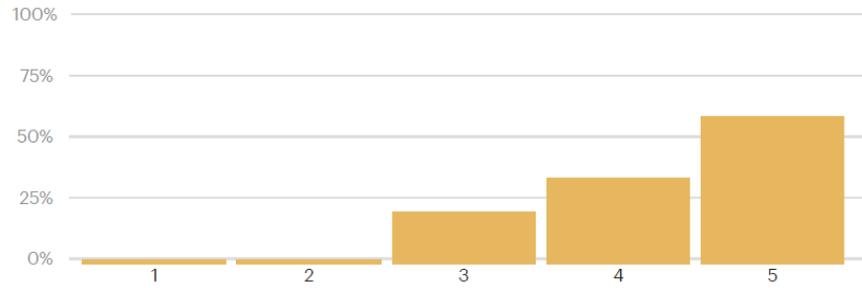

4 / 5

### “Reduce light pollution”

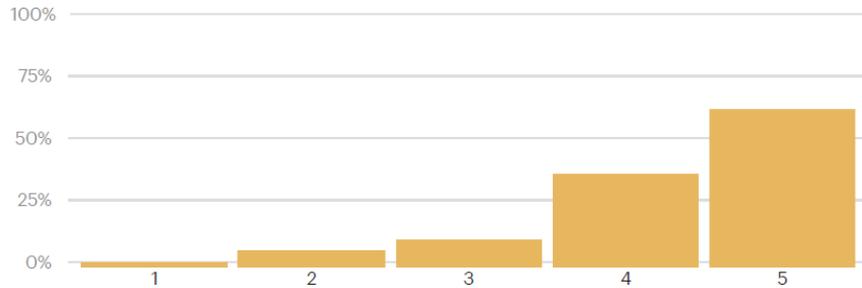

“Réduire la pollution de l’air et les gaz à effet de serre.”

Moyenne / Average

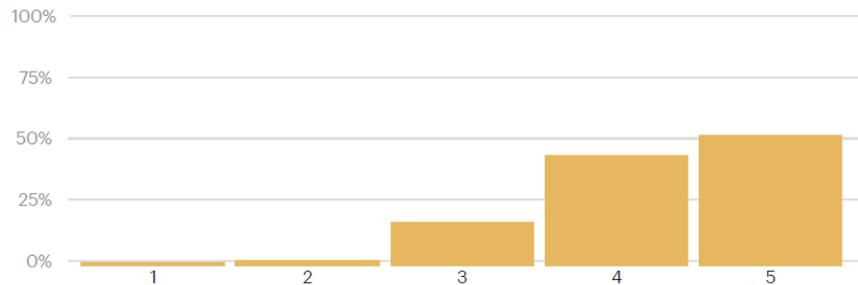

4.25 / 5

“Reduce air pollution and greenhouse gases”

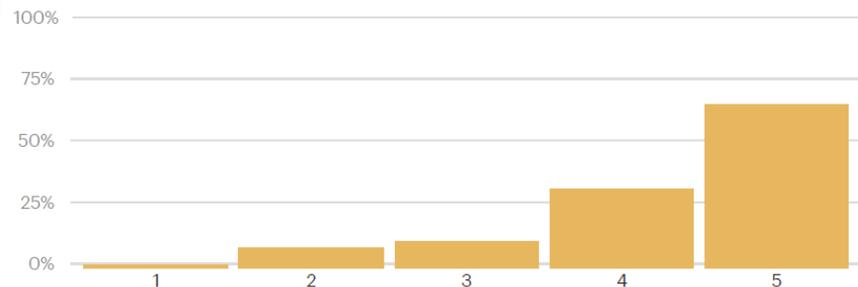

### “Protéger la qualité des sols.”

Moyenne / Average

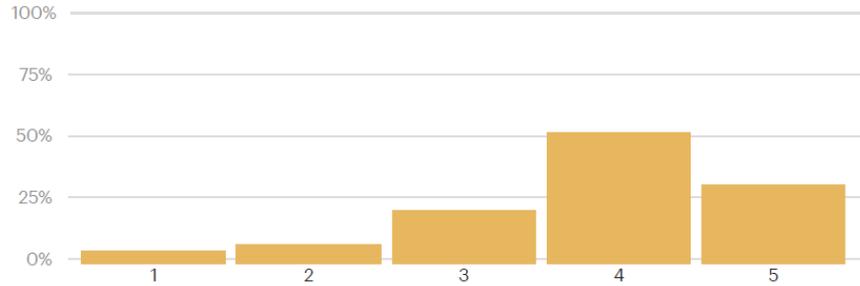

4.25 / 5

### “Protect soil quality”

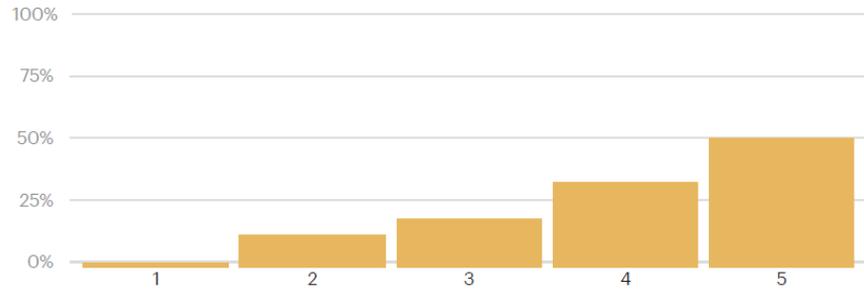

### “Réduire les matières résiduelles.”

Moyenne / Average

3.9 / 5

### “Reduce residual materials”

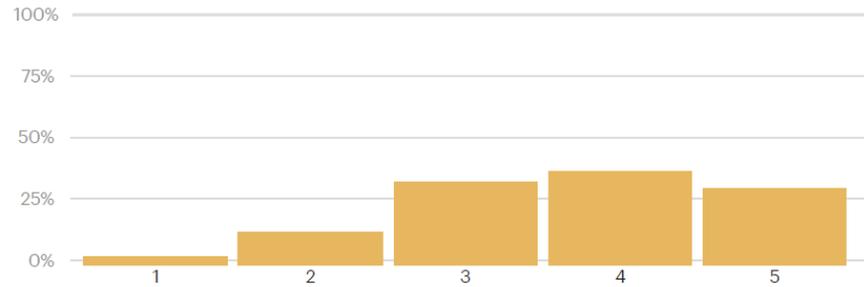

Qualité  
de vie optimale

---

Optimal  
quality of life

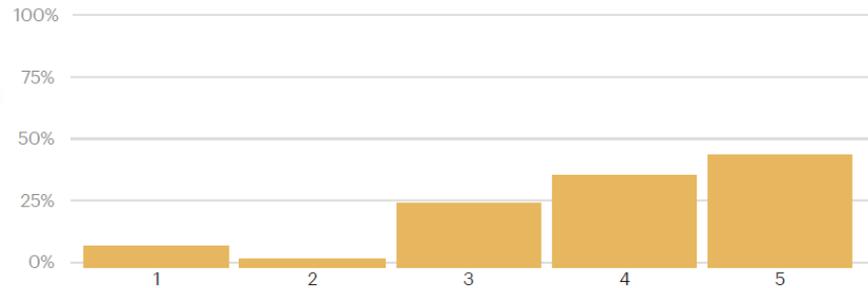

“Poursuivre les efforts d’embellissement des espaces publics et des propriétés privées.”

Moyenne / Average

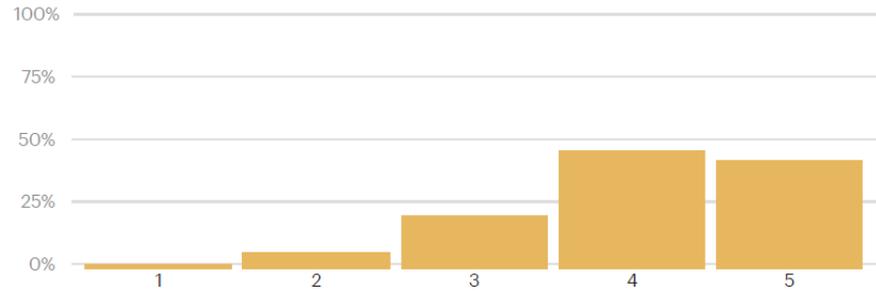

3.8 / 5

“Continue efforts to embellish public spaces and private properties”

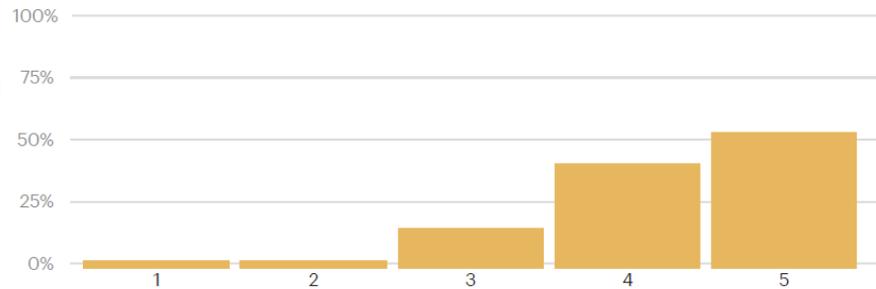

“Maintenir une qualité environnementale compatible avec des objectifs élevés de santé publique.”

Moyenne / Average

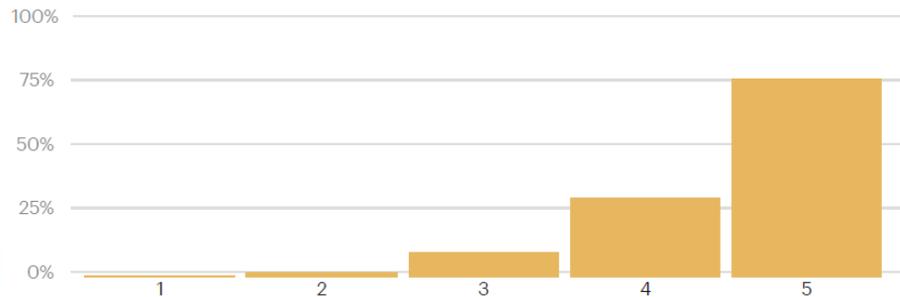

4.1 / 5

“Maintain environmental quality consistent with high public health objectives”

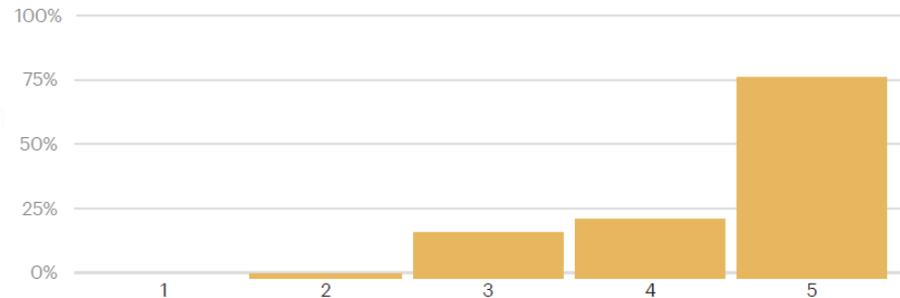

“Protéger les espaces verts et bleus, publics et privés.”

Moyenne / Average

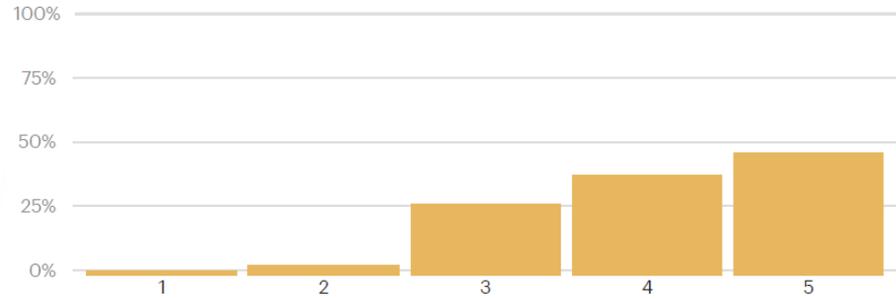

4.5 / 5

“Protect public and private green and blue spaces”

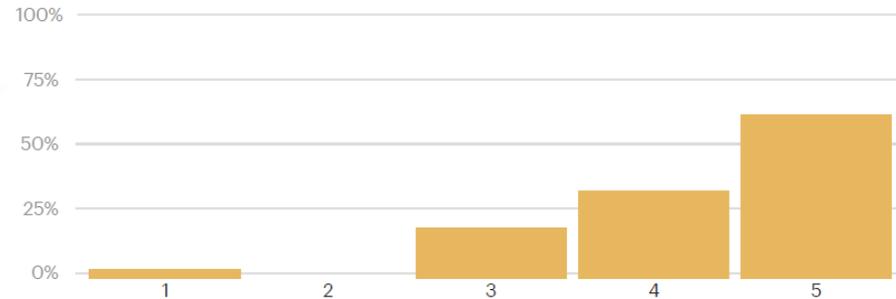

“Favoriser la cohabitation des humains, animaux domestiques et sauvages.”

Moyenne / Average

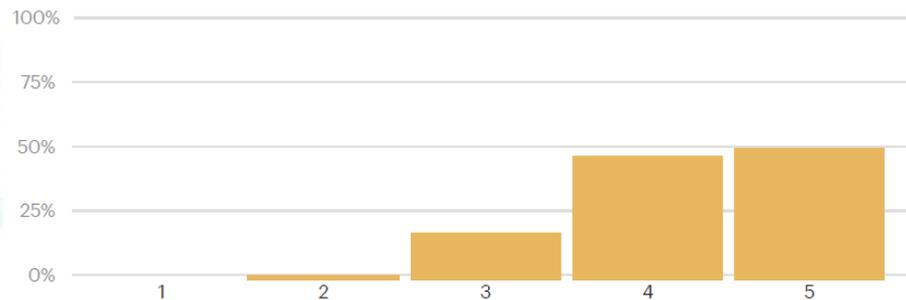

4.2 / 5

“Promote cohabitation of humans, domestic and wild animals”

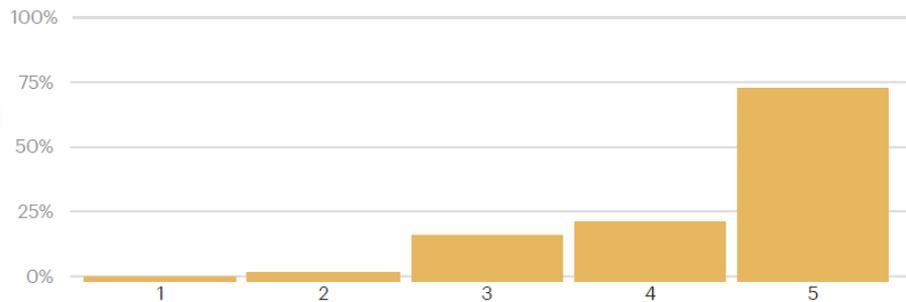

“Aménager le territoire pour la protection et la migration des animaux.”

Moyenne / Average

4.3 / 5

“Plan the territory for animal protection and migration”

43 % des répondants ont manifesté leur désir de s'impliquer dans la suite des travaux du comité.

---

43% of respondents indicated a desire to be involved in further proceedings.

**Vos  
commentaires**

---

**Your  
comments**

"Si on veut protéger le couvert forestier, on doit limiter le développement résidentiel. Augmenter la superficie minimale des terrains à construire"

"La préservation du couvert forestier me paraît essentielle et permet d'atteindre plusieurs objectifs en même temps : qualité de l'air, préservation de la biodiversité, corridors migratoires, protection des rives, accès à des sentiers... Ce devrait être "l'ADN" de Morin-Heights!"

"Poursuivre les efforts d'embellissement des espaces publics et des propriétés privées"

"Ces initiatives devraient être accompagnés de sessions d'information pour aider les citoyens sur les moyens"

"La qualité de l'eau tant pour la consommation que pour la baignade est primordiale"

"Faire un inventaire des espèces aquatiques et terrestres sur notre territoire serait une très bonne idée"

"Balancing development with preserving forest is a key"

"Allow beach access to lakes; create public beaches"

"Cutting of any tree should carry a permit. The best way to stop erosion."

"forbid use of pesticides and non-organic fertilizers"

"Create green spaces everywhere possible"

"Let the wild flourish"

"Important to ensure drinking water quality from artesian wells "

"I believe that the lot size should be increased to a minimum of 8,000 sqm and also reduced the % of trees that are allowed to be cut"

"Préserver les milieux humides"

"Plant local wildflowers for pollinators"

"Reducing light pollution saves energy and saves insects, a valuable part of the bird and animal food chain"

"Preventing eutrophication will naturally happen if we take care of erosion and control contaminants, same thing for swimming areas"

"Limiter le développement urbain de notre municipalité. Préserver les milieux humides "

"Water is life. Nothing less. We need to protect it"

"La forêt à Morin-Heights est un bijou, il faut la préserver"

**MERCI**
